

We are SecureWais, a specialist security company, with more than twenty years' service offering bespoke Security solutions, we are one of only a handful of security providers with our own Computer Software and IT division which means, we offer enhanced capabilities, responsiveness, security, costings and efficiency.

Due to the expansion of our business and our additional new client projects, we have some exciting new opportunities for:

Service/Maintenance, Call-out and Installation Engineers

Role Overview:

This position will require you to visit client premises to carry out installation, commissioning, maintenance and repair work on a variety of Intruder Alarm, CCTV and Access Control systems as well as PPM projects and services from start to completion.

Main Responsibilities:

- Install and commission security systems
- Planned maintenance of Security systems, including repairs, fault-finding and installation
- Completion of all necessary paperwork
- Customer liaison and building solid working relationships

The ideal Candidate will have/ be:

- Minimum of 2 years Security engineering experience - any qualifications/training will be an advantage
- ECS / CSCS - good knowledge of H&S requirements
- Proficient in both written and spoken English
- Willingness to travel

In return, for the right candidate we offer:

- A competitive basic salary (dependent on experience)
- Great career prospects & future opportunities with a growing company which has been operating within the electronic security industry for more than 30 years
- 20 x days annual leave + bank holidays (with annual increase of holiday allowance after more than 3 years employment)
- Employee shares scheme (after 18 months employment)

Our Clients are all London City and / or West End based, as such we do not use vehicles.

If you feel that you meet our criteria and **want an exciting and challenging role** where you can **enhance your skills** and build a **long-term career**, then this role is for you!
